

Problem

Given an array of n integers x1,x2,...,xn, our task is to find the maximum sub array sum,i.e., For example, in the array [-1, 2, 4, -3, 5, 2, -5, 2] the following subarray produces the maximum sum 10: [-1, 2, 4, -3, 5, 2, -5, 2]

Input Format

Two line input First line should read an integer value which represents size of array Second line consits list of elements(integers) separated by space

Constraints

1

Output Format

It prints integer value which represents maximum sub array sum

Sample Input 0

8
-1 2 4 -3 5 2 -5 2

Sample Output 0

10

Sample Input 1

7
-3 4 -1 2 1 -4 3

Sample Output 1

6

Sample Input 2

8
-1 2 4 -3 5 2 -5 2

Sample Output 2

10

Sample Input 3

6
-1 2 3 4 5 -15

Sample Output 3

Language

Java 7

```
1
2      import java.util.*;
3      public class Solution {
4          void sol() {
5              Scanner sc = new Scanner(System.in);
6              int size = sc.nextInt();
7              int[] n = new int[size];
8              for (int i = 0; i < size; i++) {
9                  n[i] = sc.nextInt();
10             }
11             int max_sofar = n[0];
12             int max_end = 0;
13             for (int i = 0; i < n.length; i++) {
14                 max_end =max_end+ n[i];
15                 if (max_end > max_sofar) {
16                     max_sofar = max_end;
17                 }
18                 if (max_end < 0) {
19                     max_end= 0;
```
