

Problem

The merged array should also be sorted in non-decreasing order. Complete the function mergeSortedArrays that takes the following parameters:
int arr1[n]: the first sorted array
int arr2[m]: the second sorted array
Returns int[]: the merged sorted array

Input Format

The first line contains an integer n, the size of the first array.
The second line contains n space-separated integers representing the first sorted array. The third line contains an integer m, the size of the second array. The fourth line contains m space-separated integers representing the second sorted array.

Constraints

1 ≤ n, m ≤ 10^5 - 10^9 ≤ arr1[i], arr2[i] ≤ 10^9 Both arrays are sorted in non-decreasing order.

Output Format

Print the merged sorted array as space-separated integers.

Language Java 7

```
1 import java.util.*;
2 public class Main {
3     public static void main(String[] args) {
4         Scanner sc = new Scanner(System.in);
5         int s1 = sc.nextInt();
6         int[] a1 = new int[s1];
7         for (int i = 0; i < s1; i++) {
8             a1[i] = sc.nextInt();
9         }
10        int s2 = sc.nextInt();
11        int[] a2 = new int[s2];
12        for (int i = 0; i < s2; i++) {
13            a2[i] = sc.nextInt();
14        }
15        int[] res = new int[s1 + s2];
16        int i = 0, j = 0, k = 0;
17        while (i < s1 && j < s2) {
18            if (a1[i] < a2[j]) {
19                res[k++] = a1[i++];
```
