

Problem

A subsequence is a sequence that can be derived from another string by deleting some or no characters without changing the order of the remaining characters.

Print:

YES if "hackerrank" is a subsequence of s. NO otherwise.

Input Format

The first line contains an integer q, the number of test cases.

Each of the next q lines contains a string s.

Constraints

$1 \leq q \leq 100$ $1 \leq |s| \leq 10^5$

The sum of the lengths of all strings does not exceed 10^6 .

Output Format

For each test case, print:

YES

or

NO

Sample Input 0

hackerworld

Sample Output 0

NO
