

Given a string S, find the smallest positive length P such that the string can be formed by repeating its prefix of length P

Input Format

A single line containing the string S.

Constraints

$1 \leq |S| \leq 10^5$ S contains lowercase English letters.

Output Format

Print the smallest period of the string.

Sample Input 0

ababab

Sample Output 0

2

Language

Java 15

```
1 import java.util.Scanner;
2 public class StringPeriod{
3     public static int getMinimumPeriod(String s){
4         int n=s.length();
5         int[] pi=new int[n];
6         char[] arr=s.toCharArray();
7         for(int i=1;i<n;i++){
8             int j=pi[i-1];
9             while(j>0&&arr[i]!=arr[j]){
10                 j=pi[j-1];
11             }
12             if(arr[i]==arr[j]){
13                 j++;
14             }
15             pi[i]=j;
16         }
17
18         int longestBorder=pi[n-1];
19         return n-longestBorder;
20     }
21
